---

Rough order of magnitude Comprehensive Lighting Audit approximately 6790 fixtures 320,000 sf ($4.44 per sf). **$72,000** ,

I figure it will take a bit under a month to do the survey and a month for a report from the electrical engineer. I don't have any estimate or information about finishing the investigation which requires comparing the existing lighting to the new lighting but Danny said today he will have lighting fixture types and quantities when the construction estimates come in. We will have to finish this SOW to include the final analysis showing energy reduction so that we have a document to support reduction in annual operating costs.

The lease required the lessor to provide expense receipts during the exercising of the 10 year option.

FERC hasn't received any energy consumption data from the Lessor since 2014.
